| 25X1A | Subject : Task Order No. 17(8621)67 R | | | | | | |
| | Gentlemen: | | | | | | |
| | Reference is made to the subject task order entered into with your firm as of 12 December 1966. | | | | | | |
| 25X1A | A recent meeting held by the Contracting Officer with the Technical Representatives responsible for this task order has brought out an expression of concern by the Technical Group as to the adequacy of the work being performed. Specifically this concern is predicated on the impression that the project has suffered from a dilution of management, supervision, and technical direction. It is the opinion of the Center that the recent organizational restructuring within reduced the effectiveness of the team as compared to that originally proposed and agreed upon for Phase II of this project. This becomes significant when the agreed upon goals of the present contract appear to be adversely affected. Some examples are as follows: | | | | | | |
| | a. Conversations with some of theteam members offer disturbing evidence that few have any apparent knowledge of the other's efforts. This leads to the question of "what kind of system integration control is being exercised and by whom?" | | | | | | |
| 25X1A | b. Many Center component representatives are forced to go over the same ground with each of the | | | | | | |
